DETAILED ACTION

Response to Amendment

1. Applicant's amendment was received on 6/8/06, and has been entered and made of record. Currently, **claims 1-12, 15, and 18** are pending.

Allowable Subject Matter

2. **Claims 1-12, 15 and 18** are allowed (**renumbered as claims 1-14, respectively**).
3. The following is an examiner's statement of reasons for allowance:

Regarding **claims 1, 11, 12, 15 and 18 (renumbered claims 1, 11-14, respectively)**, in the examiner's opinion, it would not have been obvious to have the system, as claimed, include the features of executing a control, in the presence of new image data in at least one public folder, on which access has been permitted in the access exclusion setting, on the basis of the permission/non-permission information on the access exclusion setting, which has been received by the reception means, to read the new image data from the public folder and store it in the second storage means, and delete the new image data from the public folder. The closest prior art, previously noted as Miyazawa *et al.* (U.S. Patent Application Publication US 2001/0003189), fails to expressly disclose these features. Because of this, the claims are rendered allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
